

# A-FLX™ FFPE CELL PELLETS

The ultimate research and diagnostic tools and reference materials

**Formalin-Fixed Paraffin-Embedded (FFPE)** specimens are an important sample type for research and diagnostics. However, considerable variabilities may occur during sample collection and processing, leading to inconsistent downstream analyses. **A-FLX™ FFPE Cell Pellets** are prepared under strictly controlled conditions and manufactured with high precision and consistency, making them ideal tools for biomarker discovery, assay development, and testing reference materials.

Single Cell Pellet    Custom Size    Cell Pellet Array    On-slide Control    Cell Pellet Scroll

- High consistency
- High quality biomolecules
- Versatile formats
- Over 300 in-house cell lines
- Validated biomarkers controls
- Highly customizable
